Career Objective

Motivated Computer Science Engineering student aspiring to build a career as a Data Analyst. Seeking an entry-level role to apply analytical skills, Power BI expertise, and programming knowledge to transform data into meaningful insights and support data-driven decision making.

Professional Summary

Detail-oriented and analytical aspiring Data Analyst with hands-on internship experience in Power BI and Python. Experienced in data visualization, student performance analysis, and job scheduling optimization using dynamic programming. Strong problem-solving skills with the ability to present insights clearly. Certified in Power BI and Python Data Structures & Algorithms.

Education

Bachelor of Engineering – Computer Science and Engineering

TMHNUV Matriculation Higher Secondary School, Theni

Technical Skills

- **Programming Languages:** Python, C
- **Data Analysis & Visualization:** Power BI
- **Concepts:** Data Analysis, Dynamic Programming, Algorithms
- **Tools:** Power BI, MS Excel (Basics)

Experience

Excel-Zhahi Info Tech

- Worked with Excel to organize, clean, and analyse datasets
- Used formulas, functions, and pivot tables to summarize data
- Created charts and reports to present data insights clearly

Power BI Intern – Zhahi Info Tech

- Created interactive dashboards and reports using Power BI
- Analysed datasets to identify trends and performance metrics
- Improved data understanding through effective visual storytelling

Python Data Structures and Algorithms Intern – RSun Technology

- Worked on Python-based data analysis tasks
- Implemented algorithms and data structures for problem-solving
- Applied dynamic programming concepts in real-world scenarios

Data Analystic-Online Learning

- Learned data analysis using Excel, SQL, and Power BI
- Practiced data cleaning, transformation, and visualization
- Developed understanding of data-driven decision making

Project

Sales Performance(Excel)

- Built an interactive sales dashboard in Excel using Pivot Tables, Charts, and Slicers.
- Analysed sales data to track key metrics like Total Sales, Profit, and Units Sold.
- Visualized product, region, and salesperson performance to identify business insights.

Student Performance Analysis(Power BI)

- Analysed student academic data to identify performance patterns
- Built Power BI dashboards to visualize trends and insights

Job Scheduling Optimization using Dynamic Programming(Python & Power BI)

- Designed an optimized job scheduling solution
- Improved execution efficiency using algorithmic techniques

Battery Theft and Over-Discharge Lockout for E-Bikes(NSCET Hackathon)

- Developed a smart protection system for E-bikes to prevent battery theft and avoid over-discharge.
- The system improves battery safety, extends battery life, and enhances vehicle security.

Solar Efficient System(NSCET Hackathon)

- Developed an energy-efficient solar power system to optimize electricity usage and improve renewable energy utilization.
- The system helps monitor energy generation and enhance power efficiency.

Certifications

- Power BI

- Python Data Structures and Algorithms
- Python & C Programming
- Data Analytics
- Django and it's Framework in Python

Languages

- English
- Tamil

Personal Details

- **Date of Birth:** 09-11-2004
- **Gender:** Female
- **Nationality:** Indian
- **Marital Status:** Single

Date: **Signature**
